Features

- Convert RS-232 to RS-485 signals
- Extend RS-232 data signals up to 1.2 km
- Data rate: 115.2 kbps
- 2000V two-way optical isolation (ULI-224TCL)
- Quick, inline installation
- DIP switch selectable RS-422 or RS-485
- RS-232 port-power or 12 Vdc external power (sold separately)
- Isolated model requires 12 Vdc external power (sold separately)

Introduction

Advantech ULI series converters convert RS-232 to RS-422/RS-485 using either port-power or an external power supply. Data is converted in both directions, RS-232 TD is converted to balanced RS-422 or RS-485 TD. Received RS-422/485 signals are converted to RS-232. Automatic Send Data Control eliminates the need for programming hardware handshaking signals to control RS-422 or RS-485 operation. Model ULI-224TCL provides 2000 V optical isolation and requires an external power source.

ULI-224TB BB-485BAT3

Battery Powered RS-232 to RS-422/485 Serial Converter

Features

- Change RS-232 TD and RD to RS-485 signals
- Extend RS-232 data signals up to 1.2 km
- Data rates up to 115.2 kbps
- 3 powering options: battery (2) AAA, RS-232 handshake lines, or external power supply (not included, sold separately)
- Quick, easy inline installation
- Automatic Send Data Control – no software drivers necessary

Introduction

With three power options, Model ULI-224TB (BB-485BAT3) is ideal for field service applications. Use battery power with a low-power RS-232 port (laptop), when handshake lines are unavailable, or when a PSU is not possible. The unit draws available power from the RS-232 port getting additional current from the batteries. If you have a full-power port and handshake lines, turn Off the battery switch to use port-powering, saving the batteries for emergencies. (Battery On/Off switch conserves battery life; it does not turn on/off all power.)

Introduction

ULI-224 series industrial adapters convert RS-232 to RS-422/485. Optical isolation and surge suppression protect connected equipment from ground loops and surges - ideal for factory/warehouse automation, in-cabinet, security and other applications. Models ULI-224TCI and ULI-224TE provide premium 3-way isolation on input, output and power lines. Model ULI-224TCI is UL C1/D2 certified for rugged industrial use. Model ULI-224TE meets IEC-61850-3 and IEEE-1613 for electrical substations.

Introduction

ULI- series RS-232 to RS-422/485 converters meet heavy industrial EMC standards. Bit-wise enabled circuitry automatically detects character time-outs – no need to set DIP switches for baud rate. Basic model ULI-224TH is designed for less demanding temperatures or when isolation is not required, such as applications where the data line does not exit the control cabinet. Model ULI-224THC is more robust and suitable for protecting expensive control equipment.
