Hentet fra https://docs.influxdata.com/influxdb/v2/install/?t=Linux

1 - Install InfluxDB as a service with systemd
Ubuntu/Debian ARM64
curl -O https://dl.influxdata.com/influxdb/releases/influxdb2_2.7.4-1_arm64.deb
sudo dpkg -i influxdb2_2.7.4-1_arm64.deb

2 - Start the InfluxDB service:
sudo service influxdb start

3 - Restart your system and verify that the service is running correctly:
sudo service influxdb status

Set up InfluxDB through the UI
With InfluxDB running, visit http://localhost:8086.
Click Get Started
Set up your initial user
